Work Experience

Programmer Analyst I
UST MFG LLC
February 2023 to Present

Developed and optimized in-house applications using C#, enhancing system efficiency and user experience.

Led the migration of a warehouse receiving system from WinForms (.NET 4.6) to ASP.NET 8 with Entity Framework Core, modernizing the application for improved performance and scalability.

Automated the warehouse receiving process, reducing processing time by several hours per user daily, allowing inventory to move directly to sampling instead of being delayed at the dock.

Converted a PHP-based application to ASP.NET 8 with Entity Framework Core, streamlining early quote processing and Bill of Materials approvals for quality and account managers, resulting in better scalability and increased speed.

Managed and enhanced a large quoting system used by Account Managers and Executives, improving real-time quote price approximations and maintaining system efficiency.

Facilitated user feedback sessions to identify and resolve bugs, continuously improving workflow efficiency and system usability.

Inventory Clerk
NUTRACEUTICAL
August 2019 to February 2023

Streamlined order tracking and communication via Outlook and Teams. Resolved technical issues for staff.

Education

BACHELORS in COMPUTER SCIENCE
WEBER STATE UNIVERSITY
2019 to 2024
